

Derigo®

The most versatile tool

in roadside management

Derigo® is a selective herbicide that offers a one-stop solution for post-emergent weed control and plant growth regulation on warm-season roadside grasses. Derigo means less mowing and fewer passes, translating to increased safety, efficiency and cost savings. With this kind of versatility in roadside management, you'll wonder how you ever got by without it.

About Derigo

Derigo controls many invasive grasses and broadleaf weeds while promoting healthy grass cover, offering unparalleled versatility for managing warm-season grasses on roadsides. Not only does it target a broad-spectrum of troublesome grassy and broadleaf weeds, it also provides seedhead and growth suppression benefits on bahiagrass – replacing the need for multiple products. Technology like Derigo opens the door to improved conditions on highway roadsides and to a more sustainable management program over time.

Derigo delivers versatility and increased efficiency

- // Low volatility, low use rate combination of active ingredients for roadside use
- // Seedhead and growth suppression benefits on bahiagrass
- // Effective against more than 30 species of undesirable grasses and more than 100 broadleaf weeds
- // Encourages healthy growth of desirable grass types
- // Helps roadside managers reduce mowing intervals by controlling undesirable plants and promoting conditions for desirable, low-growing roadside grasses

Application and use

- // Can be used on many desirable, warm-season grasses including bermudagrass, zoysiagrass and centipedegrass
- // For general weed control, apply at a rate of 3 to 6 ounces per year (do not exceed 6 ounces per acre per year)
- // For bahiagrass growth regulation, apply at a rate of 1.5 to 3 ounces per acre
- // For non-crop use only

Derigo can be used for selective and bareground weed control in areas such as:

- | | | |
|-------------------------------|---------------------------|---------------------------|
| // Roadsides | // Parks | // Municipal sites |
| // Non-irrigation ditch banks | // Natural areas | // Manufacturing sites |
| // Pipelines | // Recreational areas | // Sewage disposal sites |
| // Airports | // Military installations | // Other commercial sites |
| // Railroads | // Educational facilities | |
| // Utility rights-of-way | // Restoration sites | |

Derigo controls more than 130 broadleaf and grassy weed species, including the following:

Broadleaf Weeds

- | | |
|----------------------|--------------------------|
| // Buckhorn plantain | // Giant ragweed |
| // Curly dock | // Horseweed (marestail) |
| // Dandelion | // Prostrate spurge |
| // Dogfennel | // Wild carrot |
| | // Wild mustard |

Grassy Weeds

- | | |
|--------------------|------------------|
| // Carpetgrass | // Goosegrass |
| // Dallisgrass* | // Johnsongrass* |
| // Fescue | // Ryegrass |
| // Foxtail species | // Vaseygrass* |

* Weeds may need a second application of this product for acceptable control.
