

PRINCIPAL FUNCTIONING AGENTS:

Surfactants, humectants, free fatty acids	90%
Constituents ineffective as a spray adjuvant	10%
TOTAL	100%

All ingredients are exempt from tolerance under 40 CFR 180.
Surfactant content: 70%

**KEEP OUT REACH OF CHILDREN
DANGER**

Cause skin irritation. Causes serious eye damage.

Read label before use. Keep container tightly closed. Keep only in original container. Avoid breathing dust, fume, gas, mist, vapors or spray. Wash hands thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves, protective clothing, eye protection and face protection.

FIRST AID

Have the product container with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do then continue rinsing. Call a poison center, doctor, or physician to specify the appropriate source of emergency medical advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing and wash it before reuse. Wash with plenty of soap and water for several minutes. If skin irritation occurs: Get medical advice or attention.

IF SWALLOWED: Call a poison center, doctor or physician if you feel unwell. Unless advised otherwise by a poison control center or doctor, have person rinse mouth with water, if able. Do not give anything by mouth to an unconscious person.

IF INHALED: If breathing is difficult, remove person to fresh air and keep at rest in a position comfortable for breathing. If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth to mouth if possible.

GENERAL INFORMATION

PLATINUM meets the requirements for surfactant level of most pesticides that require or recommend the use of a nonionic surfactant. Other products may not. If the surfactant level is not stated on the competitive label, it may not meet the requirement on the label of the tank mix partner pesticide.

PLATINUM is a superior-quality, nonionic surfactant designed to ensure the best performance of pesticides under a wide variety of conditions. The high level of surfactant increases the spreading, wetting and penetration of pesticide products. The performance enhancement provided by **PLATINUM** delivers greater control of hard-to-kill weeds, more thorough kills in target insects and more consistent performance under a wider variety of conditions.

Nonionic surfactants that are significantly less expensive than **PLATINUM** contain less surfactant. The amount of surfactant is the key to biological efficacy.

DIRECTIONS FOR USE

FOR USE WITH PRODUCTS REGISTERED FOR: AQUATIC, FORESTRY, INDUSTRIAL, MUNICIPAL, NON-CROPLAND, ORNAMENTAL, RIGHTS- OF-WAY, TURF, AGRICULTURAL AND OTHER USES.

Follow the recommendations of the most restrictive active ingredient label.

Tank mixtures should only be applied within the label recommendations of every product in the tank mixture. If the label does not state a specific order of addition, add **PLATINUM** last, after all other tank mix partners have been added but before final water addition. A defoamer is included in the formulation for easier mixing.

The addition of this and other products may cause phytotoxicity. Prior to the addition of **PLATINUM** to the tank, the user or advisor must have experience with the combination used in the tank or have conducted a phytotoxicity trial.

USE RATES

Follow the rates on the pesticide product label. If a rate is not specified or if they allow a wide range of use rates, follow the recommendations below:

Application	Recommended Rate	Low Rate (1)	High Rate (2)
Pints per 100 gallons of spray mix (% of tank mix by volume)			
Ground, Aerial, CDA	2(0.25)	1(0.125)	4(0.5)
Aquatic	2(0.25)	1(0.125)	4(0.5)

- (1) Use the low rate where weeds are very young and easy-to-kill, if allowed on label.
- (2) Use the high rate during drought or when weeds are large and hardened off, if allowed on the label.

STORAGE AND DISPOSAL

Storage: Store in a cool well-ventilated place. Keep in original container tightly closed. Do not reuse empty container. Do not store with food, feed, or other material to be used or consumed by humans or animals. Do not contaminate water supplies. For optimal storage, store between 40° and 90° F.

Disposal: Do not contaminate water, food or feed by storage or disposal. Dispose of contents in container to an approved waste disposal facility in accordance with all local, regional, national and international regulations. Triple rinse (or equivalent) adding rinse water to application tank. Offer container for recycling or dispose of in a sanitary landfill or by other procedures approved by local regulations. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrecycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

WARRANTY STATEMENT

Red River warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to the label instruction, or any abnormal conditions, or under conditions not reasonably foreseeable to Red River, and buyer assumes the risk of any such use.
