

Elite

drift control agent/deposition aid

PRINCIPAL FUNCTIONING AGENTS:

Proprietary combination of oils and emulsifiers	99%
Constituents ineffective as a spray adjuvant.....	1%
TOTAL	100%

All ingredients are exempt from tolerance under 40 CFR 180.

KEEP OUT OF REACH OF CHILDREN

Read label before use. Keep container tightly closed. Keep only in original container. Avoid breathing dust, fume, gas, mist, vapors or spray. Wash hands thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves, protective clothing, eye protection and face protection.

FIRST AID

Call a poison control center or doctor immediately for treatment advice.

Have the product container with you when calling a poison control center or doctor, or going for treatment.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do then continue rinsing. Have the product container with you when calling a poison control center or doctor, or going for treatment.

IF ON SKIN OR CLOTHING: Take off contaminated clothing and wash it before reuse. Wash with plenty of soap and water for several minutes. Call a poison center or doctor to specify the appropriate source of emergency medical advice.

IF SWALLOWED: Unless advised otherwise by a poison control center or doctor, have person rinse mouth with water, if able. Do not give anything by mouth to an unconscious person. Immediately call a poison center or doctor to specify the appropriate source of emergency medical advice. **DO NOT INDUCE VOMITING.**

IF INHALED: If breathing is difficult, remove person to fresh air and keep at rest in a position comfortable for breathing. If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth to mouth if possible.

Personal Protective Equipment: Wear chemical-resistant eyewear and gloves, long-sleeve shirt and pants and shoes and socks.

GENERAL INFORMATION

ELITE VELOCITY is used as a spray adjuvant to improve deposition of spray droplets. **ELITE VELOCITY** improves spreading and reduces the production of fine droplets which are susceptible to movement from the spray pattern.

The degree of drift hazard varies with the type of pesticide, application conditions and the vegetation near sprayed area. This product is intended as a management tool to reduce drift and improve deposition. Common sense and sound application technology must be followed when spraying pesticides.

ELITE VELOCITY does not produce large spray droplets like some polymer drift products. Internal cohesion of the components helps prevent droplet shearing into fines which move off target.

DIRECTIONS FOR USE

ELITE VELOCITY may be mixed with pesticides in conventional spray equipment but should be the last additive prior to completely filling the spray tank with water.

ELITE VELOCITY may be applied through direct injection systems when pumped with proper amount of water. Do not premix with EC's or aqueous solutions. Ensure adequate rinse between additives.

APPLICATION RATES

Aerial and Ground Spraying Suggested Rates Per Acre

Herbicides and fungicides: 4 – 6 ounces of **ELITE VELOCITY**

Insecticides: 2 – 4 ounces of **ELITE VELOCITY**

NOTE: Do not exceed 1% v/v of the spray solution.

The addition of an adjuvant to some pesticides, pesticide combinations, and/or fertilizers may cause phytotoxicity to the foliage and/or fruit of susceptible crops or nontargeted vegetation. Prior to the addition of the product to a spray tank mix, the user or application advisor must have experience with the combination and/or must have conducted a jar test for compatibility.

Aquatic Use: **ELITE VELOCITY** can be used for aquatic applications including surface water. Always follow tank mix product labels for specific directions and precautions. **ELITE VELOCITY** use rate of 4-6 oz./A. Do not exceed 6 oz./A.

STORAGE AND DISPOSAL

Storage: Store in a cool, dry place. Store in original container only. Do not add anything to the container. Keep container tightly sealed when not in use. Do not store near fire, flame or other potential sources of ignition. Do not contaminate water, food or feed by storage or disposal of this product. For optimal storage, store between 40° and 90° F.

Disposal: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal if allowed by law. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org. Decontaminated containers and **ELITE VELOCITY** materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

WARRANTY

Red River warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to the label instruction, or any abnormal conditions, or under conditions not reasonably foreseeable to Red River, and buyer assumes the risk of any such use.

Tech Matrix

Deposition Aid / Drift Control
Canopy Penetration
Ground or Aerial application
Non Polymer / Guar Formulation
Non Shearing formulation
Easy mix formulation
