

Escort[®] XP

*Apply less.
Get more.*

While other herbicides require pounds or gallons of product to do the job, Escort[®] XP offers better control using only a few ounces. It can control the invasive species that prove too difficult for many other herbicides. Use Escort XP to treat the toughest brush, like Elm and Eastern Red Cedar, plus the toughest vines, like Kudzu.

About Escort XP

Primarily used as a post-emergent herbicide across the United States, Escort XP cost-effectively controls many annual and perennial weeds, plus tough woody plants. Selective to many grasses, Escort XP is known for its low use rates and flexible application timing. Symptoms can often be seen in as little as 2-4 weeks.

Application and use

- // Escort XP is a dry flowable that is mixed in water and applied as a spray
- // Controls annual and perennial weeds, plus unwanted woody plants on:
 - Rights-of-way
 - Industrial sites
 - Non-crop areas
 - Types of unimproved industrial turfgrass
 - Conifer and hardwood plantations

Application tips

- // For best control of annual weeds, apply to young, actively-growing weeds
- // For best control of perennial weeds, apply:
 - At the bud/bloom stage in spring
 - Or during the rosette stage in fall
- // Warm, moist conditions enhance effectiveness
- // Apply using aerial or ground equipment
- // Can be used year-round on some warm-season grasses

Benefits of using Escort XP:

- // Applied at a low use rate – reducing the chemical load on treated acres without compromising weed control
- // Dry flowable process – offers better solubility in the tank and more uniform spray coverage
- // Less mess – little to no dust
- // Selective – will not harm certain desirable grasses
- // Flexible – can be tank-mixed to broaden the weed control spectrum
- // Effects may be seen within 2-4 weeks
- // Not a federally restricted-use pesticide

Perennial and annual weeds controlled:

- // Annual Sowthistle
- // Chicory
- // Dandelion
- // And more

Weeds and vines controlled:

- // Blackberry
- // Dewberry
- // Curly Dock
- // Thistles
- // Knapweed
- // Sericea Lespedeza
- // Kudzu
- // And more

Brush controlled:

- // Ash
- // Elm
- // Black Locust
- // Eastern Red Cedar
- // Willow
- // And more

Please see the product label for a full list of weeds and brush controlled. Do not use on crops.
