

Esplanade[®] 200 SC

*Get up to
6 months control*

with a lower use rate

If you are a vegetation maintenance manager, you're probably responsible for maintaining large industrial, gravel and bareground areas where weeds are not allowed. This is not an easy job. You have to work with multiple tank mixes, coordinate application schedules, and of course, stay on budget. Thankfully, there's Esplanade[®] 200 SC. With a longer residual and a lower use rate, it's setting a new standard in bareground weed control. Now you can raise the bar without raising your budget.

About Esplanade 200 SC

Esplanade 200 SC offers broad-spectrum weed control for large hardscapes, roadways and railroad sites. Just one pre-emergent application offers season-long control of more than 75 weed species.

Application and use

- // Apply Esplanade 200 SC uniformly using a calibrated sprayer
- // Provides effective bareground results on the following use sites:
 - Railroads
 - Roadsides
 - Industrial sites
 - Utilities
 - Rights-of-way

Application tips

- // For best control of annual weeds, apply before weed seed germination
- // Warm, moist conditions enhance effectiveness

Benefits of using Esplanade 200 SC:

- // Uses significantly less product per acre than competitive standards
- // Reduced time and labor costs – due to fewer applications
- // Flexible – can be tank-mixed with both pre-emergent and post-emergent herbicides
- // Odorless and non-staining
- // Minimal PPE requirement – as compared to traditional IVM herbicides
- // Not a federally restricted-use pesticide

Broadleaf weeds controlled:

- // Kochia
- // Marestalk
- // Pigweed
- // Russian Thistle
- // Yellow Starthistle
- // And more

Grassy weeds controlled:

- // Annual Bromegrass
- // Barnyardgrass
- // Crabgrass
- // Foxtails
- // Goosegrass
- // Sprangletop
- // Tufted Lovegrass
- // Annual Sedges
- // And more

Please see the product label for a full list of weeds and brush controlled.
