

# Monitor Flex

by Azelis A&ES

The Monitor Flex is a GPS-based variable flow pump and sprayer control system; with optional full application recording. Select your flex!

## 1 Legacy AccuFlow 4

Provides an easy-to-use interface to ensure you are always dispensing an accurate amount of insecticide proportionate to your ground speed in real time. No data reporting output.

## 2 Legacy Monitor 4S

Stand-alone system that will generate reports via Frontier Precisions FieldSeeker ULV Office by importing mission data from SD cards.

## 3 The future is here!

Upgraded system for generating mission data output utilizing Frontier Precisions Mesa 3 Tablet and FieldSeeker ULV Mobile software.

## A More Consistent & Economic ULV Application

Monitor Flex accurately controls liquid flow volumes dispensed using medical-grade chemical pumps to ensure a more consistent and economical ULV pesticide application.

This product integrates complete control of all engine functions of most ULV sprayers. Drivers can enjoy safer nighttime operation using a single backlit cab controller with automatic spray parameters and manual override options.

## Features & Benefits

- Visual and audible controls: Driver awareness
- Closed-Loop variable flow control: Reduce driver fatigue, treat more acres in less time, eliminate over- and underdosing, and ensure applications are within label rates
- Universal plug-and-play with Guardian ULV sprayers and easily adaptable to any gas engine sprayer brand
- Compatible with FMI pumps
- Password-protected driver profiles
- Robust GPS system to ensure appropriate product output at all times
