

# Opensight®

HERBICIDE

## Bareground Use Sites

### The Advantage of Opensight®

Opensight combines aminopyralid with metsulfuron methyl—a combination that gives vegetation management professionals broader control with less effort. Packaged as a quick dissolving, easy mixing dry-granule, Opensight delivers broad spectrum season-long control of more than 160 key weed and brush species with application flexibility.

Opensight requires less labor and is more cost-effective than tank-mixing the two active ingredients. It also delivers reliable control with less active ingredient applied per acre.

Adding Opensight to your tank mix will broaden the spectrum of control on bareground, especially on tough herbicide resistant weeds such as marestalk and Russian thistle.

### Overview

- Two Active Ingredients: Aminopyralid and Metsulfuron Methyl
- Controls 160 Weed and Brush Species
- Provides Long-Lasting Control of Problem Weeds and Brush, Including Noxious and Invasive Species
- Long Residual (4-6 Months)
- Low Use Rates:  $\leq 3.3$  oz/acre
- Not Harmful to Nearby Native Grasses
- Can be Tank Mixed with a Variety of Herbicides<sup>1</sup>

### Benefits of Opensight on Bareground

Controls tough bareground species such as Marestalk, Thistle species, and wild carrot. Also controls Russian thistle with pre-emergent applications at 3.3 oz product per acre.

- Provides Pre- and Post-Emergent Control
- Excellent Residual Properties Provide Season-Long Control
- Wide Window of Application
- Can Be Used in Riparian Areas, Up to the Water's Edge of Ponds, Streams, and Seasonally Dry Wetlands
- Season-Long Control of Broadleaf Weeds and Brush Species
- Broadleaf and Brush Control in Roadsides, Utilities, and Right-of-Ways

### Broadleaf Weeds Controlled

Actinomeris, Wingstem	Crownvetch	Kochia	Sida, Arrowleaf
Alyssum, Hoary	Crupina, Common	Lady's Thumb	Smartweed, Pennsylvania
Amaranth, Spiny	Cudweed, Purple	Lambsquarters, Common	Snakeweed, Broom
Arrowgrass, Seaside	Daisy, Oxeye	Lespedeza, Annual	Sneezeweed, Bitter
Aster	Dandelion, Common	Lespedeza, Sericea	Snow-On-The-Mountain
Bahiagrass, Pensacola	Dock	Lettuce, Miner's	Soda Apple, Tropical
Babysbreath	Dyer's Woad	Lettuce, Prickly	Sorrel, Red
Bedstraw	Evening Primrose, Cutleaf	Locoweed	Sowthistle, Perennial
Bittercrerss	False Dandelion, Carolina	Loosetrife, Purple	Sowthistle, Prickly
Blackeyed-Susan	Falseflax, Smallseed	Marshelder, Annual	St. Johnswort, Common
Brackenfern	Fiddleneck, Common	Mayweed, Scentless	Starthistle, Purple
Broomweed, Annual	Filaree, Redstem	Mayweed, Stinking	Star-Thistle, Malta
Bur Buttercup (Testiculate) Fireweed	Fleabane, Annual	Medic, Black	Starthistle, Yellow
Burclover	Garlic, Wild*	Mexicantea	Sunflower, Common
Burdock, Common	Geranium, Carolina	Mullein	Tansy, Common
Buttercup, Hairy	Goldenrod Spp	Mustard, Blue	Teasel
Buttercup, Tall	Gumweed, Curlycup	Mustard, Tumble/Jim Hill	Thistle, Russian
Camelthorn	Halogeton	Mustard, Wild	Thistle, Artichoke
Camphorweed	Hawkweed, Orange	Needles, Spanish Needles	Thistle, Bull
Campion, Bladder	Hawkweed, Yellow	Oxtongue, Bristly	Thistle, Canada
Caraway, Wild	Hemlock, Poison	Parsnip, Wild	Thistle, Italian
Carrot, Wild	Henbane, Black	Partridgepea	Thistle, Musk
Catchfly, Conical	Henbit	Pepperweed, Perennial	Thistle, Plumeless
Chamomile	Horsemint (Beebalm)	Pigweeds	Thistle, Scotch
Chickweed, Common	Horsenettle, Carolina	Plantain, Broadleaf	Thistle, Woolly Distaff
Chicory	Horseweed (Marestail)	Plantain, Buckhorn	Vervain
Cinquefoil	Houndstongue	Purslane, Common	Vetch, Common
Clover, Sweet	Ironweed, Tall	Ragweed, Common	Wallflower, Bushy
Clover, White	Ironweed, Western	Ragweed, Western	Waterpod
Cockle, Corn	Knapweed	Ragwort, Tansy	Whiteop (Hoary Cress)*
Cocklebur	Knapweed, Brown	Rush Skeletonweed	Woodsorrel, Yellow
Coreopsis, Plains	Knapweed, Diffuse	Salsify, Western	Wormwood, Absinth
Cowcockle	Knapweed, Russian	Scouringrush	Yankeeeweed
Crazyweed, Silky	Knapweed, Spotted	Shephardspurse	Yarrow, Common
Croton, Woolly	Knotweed, Prostrate	Sicklepod	

### Woody Plants Controlled

Blackberry	Mimosa
Buckbrush	Redbud
Dewberry	Rose, Cherokee
Honey Locust	Rose, Prairie Wild
Honeysuckle	Snowberry, Western
Kudzu	Wisteria
Locust, Black	Yucca*

\*Denotes weed suppression which is a reduction in weed competition compared to untreated areas. A second treatment may be necessary. The addition of 0.5 lb/A of 2,4-D may improve initial control.
