

Opensight®

HERBICIDE

Discover the Advantages of Opensight

Opensight® provides control of over 170 broadleaf weeds including many noxious, invasive weeds and brush species while preserving native grass cover. Opensight helps to increase productivity by providing season-long control with less effort due to broad spectrum activity on weeds, a wide application window and soil residual properties. Opensight is proven to be very selective to native grasses, allowing the native grass cover to release and prosper, providing the best defense against future weed invasions.

Broad-Spectrum, Long-Lasting Control

Opensight is labeled to control several tough annual, biennial and perennial broadleaf weeds, including noxious and invasive species, and certain woody plants. It has foliar and root uptake with systemic activity allowing the active ingredients to translocate throughout the plant. Soil residual activity aids in providing season-long control of many high anxiety weeds.

Opensight Use Sites

- Rangeland
- Conservation Reserve Program (CRP Acres)
- Permanent Grass Pastures
- Non-Irrigation Ditch Banks
- Natural Areas
- Rights-Of-Way
- Non-Cropland Areas
- Seasonally Dry Wetlands

Excellent Environmental Profile

Opensight® has several features that contribute to its excellent environmental profile, including:

- Low use rate (1.5 - 3.3 ounces per acre), which puts fewer pounds of active ingredient in the environment. Residual weed control reduces the need for re-treatment.
- The active ingredients have a very low toxicity to birds, fish, mammals and aquatic invertebrates.
- Can be applied up to the water's edge. Can be applied to non-irrigation ditch banks and seasonably dry wetlands (such as flood plains, deltas, marshes, and lowland sites), including the transition area between upland and lowland sites.

Broadleaf Weeds Controlled

Actinomeris, Wingstem	Crownvetch	Kochia	Sida, Arrowleaf
Alyssum, Hoary	Crupina, Common	Lady's Thumb	Smartweed, Pennsylvania
Amaranth, Spiny	Cudweed, Purple	Lambsquarters, Common	Snakeweed, Broom
Arrowgrass, Seaside	Daisy, Oxeye	Lespedeza, Annual	Sneezeweed, Bitter
Aster	Dandelion, Common	Lespedeza, Sericea	Snow-On-The-Mountain
Bahiagrass, Pensacola	Dock	Lettuce, Miner's	Soda Apple, Tropical
Babysbreath	Dyer's Woad	Lettuce, Prickly	Sorrel, Red
Bedstraw	Evening Primrose, Cutleaf	Locoweed	Sowthistle, Perennial
Bittercrass	False Dandelion, Carolina	Loosetrife, Purple	Sowthistle, Prickly
Blackeyed-Susan	Falseflax, Smallseed	Marshelder, Annual	St. Johnswort, Common
Brackenfern	Fiddleneck, Common	Mayweed, Scentless	Starthistle, Purple
Broomweed, Annual	Filaree, Redstem	Mayweed, Stinking	Star-Thistle, Malta
Bur Buttercup (Testiculate) Fireweed	Fleabane, Annual	Medic, Black	Starthistle, Yellow
Burclover	Garlic, Wild*	Mexicantea	Sunflower, Common
Burdock, Common	Geranium, Carolina	Mullein	Tansy, Common
Buttercup, Hairy	Goldenrod Spp	Mustard, Blue	Teasel
Buttercup, Tall	Gumweed, Curlycup	Mustard, Tumble/Jim Hill	Thistle, Russian
Camelthorn	Halogeton	Mustard, Wild	Thistle, Artichoke
Camphorweed	Hawkweed, Orange	Needles, Spanish Needles	Thistle, Bull
Campion, Bladder	Hawkweed, Yellow	Oxtongue, Bristly	Thistle, Canada
Caraway, Wild	Hemlock, Poison	Parsnip, Wild	Thistle, Italian
Carrot, Wild	Henbane, Black	Partridgepea	Thistle, Musk
Catchfly, Conical	Henbit	Pepperweed, Perennial	Thistle, Plumeless
Chamomile	Horsemint (Beebalm)	Pigweeds	Thistle, Scotch
Chickweed, Common	Horsenettle, Carolina	Plantain, Broadleaf	Thistle, Woolly Distaff
Chicory	Horseweed (Marestail)	Plantain, Buckhorn	Vervain
Cinquefoil	Houndstongue	Purslane, Common	Vetch, Common
Clover, Sweet	Ironweed, Tall	Ragweed, Common	Wallflower, Bushy
Clover, White	Ironweed, Western	Ragweed, Western	Waterpod
Cockle, Corn	Knapweed	Ragwort, Tansy	Whiteop (Hoary Cress)*
Cocklebur	Knapweed, Brown	Rush Skeletonweed	Woodsorrel, Yellow
Coreopsis, Plains	Knapweed, Diffuse	Salsify, Western	Wormwood, Absinth
Cowcockle	Knapweed, Russian	Scouringrush	Yankeeeweed
Crazyweed, Silky	Knapweed, Spotted	Shephardspurse	Yarrow, Common
Croton, Woolly	Knotweed, Prostrate	Sicklepod	

Woody Plants Controlled

Blackberry	Mimosa
Buckbrush	Redbud
Dewberry	Rose, Cherokee
Honey Locust	Rose, Prairie Wild
Honeysuckle	Snowberry, Western
Kudzu	Wisteria
Locust, Black	Yucca*

*Denotes weed suppression which is a reduction in weed competition compared to untreated areas.
A second treatment may be necessary.
The addition of 0.5 lb/A of 2,4-D may improve initial control.
