

Pastora[®]

Hay so good

you'll envy your livestock //

Pastora[®] herbicide helps hay and forage producers grow high-value, weed-free bermudagrass pastures and hay fields. It controls a broad-spectrum of undesirable grasses and broadleaf weeds that can easily spread, lower hay value and be toxic to animals. This outstanding control ultimately leads to a higher yield of improved-quality product that hay and forage producers demand.

About Pastora

With Pastora, bermudagrass crops compete less for moisture and nutrients, and producers get a premium price for clean, high-quality hay. Pastora is a selective, broad-spectrum herbicide that provides post-emergent control of grassy weeds – and post-emergent and residual control of broadleaf weeds – in bermudagrass pastures, meadows and rights of way.

Application and use

- // Apply to established bermudagrass at a rate of 1.0 to 1.5 ounces per acre (do not exceed 2.5 ounces per acre per year)
- // Apply to dormant bermudagrass for control of winter annual grasses such as ryegrass and broadleaf weeds, like henbit
- // Apply in spring or summer to control summer annual and perennial weeds, such as Johnsongrass and dogfennel
- // Pastora applications must include a non-ionic surfactant or a crop oil concentrate
- // Pastora can be mixed with liquid fertilizer as the carrier solution if desired

Pastora delivers outstanding control for high-quality pastures and hay

- // Fills the need for a post-emergent annual and perennial grass control herbicide with one product
- // Improved bermudagrass tolerance and safety
- // Winter annual grass and broadleaf control prior to first hay cutting helps ensure the first cutting is high-quality bermudagrass rather than construction-grade hay
- // Controls key perennial grasses and emerged summer annuals, allowing for more high-quality hay cuttings
- // Restores weed-laden bermudagrass pastures, saving significant costs associated with a total restoration
- // Effective control of sandbur and Johnsongrass

Pastora controls key broadleaf weeds and undesirable grasses, including the following:

Broadleaf Weeds

- // Bahiagrass
- // Barnyardgrass
- // Crabgrass*
- // Foxtails (bristly, giant, green, yellow)
- // Goosegrass*
- // Itchgrass

- // Johnsongrass (seedling and rhizome)
- // Ryegrass
- // Sandbur (field, longspine)
- // Signalgrass

Grassy Weeds

- // Bitter Sneezeweed
- // Buttercup
- // Common Broomweed
- // Curly Dock
- // Dogfennel
- // Henbit
- // Musk Thistle
- // Pigweed
- // Plantain
- // Thistle (musk, Scotch)
- // Woolly Croton
