Pioneer Eco-Backpack Sprayer

The Pioneer Eco-Backpack Sprayer is your solution to indoor and outdoor cold fog applications. It runs off a removable Li-Ion battery that can be charged from a standard wall outlet, giving you the freedom to work wirelessly. With dual speed settings, users can fine tune the droplet size, and apply as a barrier or ultra low volume application. Operators and onlookers can breathe easy: unlike most portable sprayers that are powered by burning fuel, the Pioneer Eco-Backpack produces no exhaust, and also runs more quietly than the typical fuel-powered sprayer. Outdoors, the Pioneer Eco-Backpack is an environment-friendly choice. Indoors, you can work in enclosed spaces without worrying about exhaust fumes. If you are looking for a portable, cable-free, environmentally friendly, low cost sprayer, this is the best choice!

- Fog Droplet size 5-50 micron
- Flow rate for water based products is 0-12 ounces/min
- Flow rate for oil based products is 0-4 ounces/min
- Solution capacity 1.6 gal
- Electric motor 450 W
- Battery type 1 x Li-Ion rechargeable battery (included)
- Dual speed settings for optimized droplet size
- Physical Weight (shipping) 22.7 lb
- Dimensions (LxWxH) 13.1 in x 12.9 in x 19.9 in
- Up to 1.5 hours of continuous operation
