### GENERAL INFORMATION

1% SOLUTION is an effective, easy-to-use adjuvant for deposition improvement and drift retardation in spraying operations. 1% SOLUTION is compatible with most water-soluble and wettable powder pesticides, desiccants and cotton defoliants when applied by aerial application or standard ground spray equipment.

### DIRECTIONS FOR USE

1. Select correct dosage from the dosage chart below.
2. Fill mix tank with water. Start to agitate.
3. If additional surfactant or other spray adjuvants are used, they may be added before 1% SOLUTION.
4. Add 1% SOLUTION.
5. Add pesticide.
6. Continue to agitate mix tank at least 2 minutes before spraying.

**NOTE:** The degree of drift hazard varies with the type of pesticide, application conditions, and vegetation near the sprayed area. Remember, pesticide drift is no accident. 1% SOLUTION will retard, but not totally eliminate the drift.
